

RAC'EM UP — Marzocchi's much anticipated inverted Carbon RAC suspension fork made its grand debut on the slopes of Whistler. Right it is, but the ride over the bumps is silky smooth.

If you've been reading *Mountain Biking* or any other bike magazine, it has been almost universally declared that Marzocchi makes some of the best suspension forks on the planet. The Italian suspenders are recognized for their plush ride, stout design and considerable strength, which have made them the faves of factory product managers and individual riders almost everywhere. When you've been designing and manufacturing suspension products for 50 years, as Marzocchi has, you gotta be doing

Z1 AND ONLY — The world's most popular single crown fork, the Marzocchi Z1, gets even better for 2001. New dual open bath damping cartridges, new extension control lock-out for better climbing, new polished magnesium Powerwing arch, new forged BAM CNC sliders, new ballless Croyline crown, and new standard or QR20 Plus drop-out option. Travel is also an option at 110 mm or 130 mm.

Marzocchi's new RAC (Reverse Advance Composite) fork features an inverted design with a one-piece carbon upper and an open-bath damping system. Internally you may choose either coil or air springs and 3-4 inches of travel. It also features adjustable compression and rebound and Marzocchi's QR20 thru-axle fork.
