More than when the majority of the riders used, the 24-cartridge offers the control of the rebound and compression low speed keeping the suspension smooth and the speed glued to ground, no matter the riding style or the terrain you are riding on. Not enough? The high speed compression can be tuned by upgrading to a custom stem clamp. www.motocycletools.com

Easy to set, the Kwik's ride trail cartridge is the first step into the high performing suspension market. Controlling the low speed rebound ensures a confident riding control increasing the level of confidence with the two wheel trail.
